Supplies:

- Cardmaker's Icy Rainbow Creative Pack
- Stacked Butterflies & Dragonflies Dazzles™
- Smooch color: Azure, Green Apple for marbleizing; Green Apple (thin with water), Pool, Sugarberry (thin with water) for painting in Dazzles™
- Acrylic block
- Embossing Heat Tool
- Sheer & Silky Ribbons
- Black ink pad
- 5"x6½" blank white card
- Zot™
- White cardstock
- Small tray (a little larger than the pieces you will be marbling)
- Small paintbrush
- Small container of water
- Paper towels
- Two sheets of plastic such as 8 ½" x 11" sheet protectors plus something heavy to weight down pieces while drying—books are great for this
- Black pen or computer printer
- Font: Monotype corsiva

Instructions:
To marbleize the card:

1. Pour 1" of water in the small tray. Dip the brush from the Azure Smooch into the water until much of the surface is covered with ink. Dip the brush from the Green Apple Smooch into the water, into clear areas on the surface, until covered with ink and the colors are marbleizing (If you wish to add a third color, now is the time).
2. Open the blank card and hold onto the back of the card (it will be straight up) with the front of the card parallel to the surface of the inked water in the tray. Place the card front face down in the water and gently push against the surface (it's fine to gently push below the surface if needed to make sure the entire surface of the card front is covered with ink). Carefully remove the cardstock and dry thoroughly using heat tool.
3. Some lightweight cards and cardstock will curl a bit from the water. Place the piece between plastic and weight it down under something heavy and allow it to dry. By marbleizing the card, you have removed most of the ink from the surface of the water. To repeat the process, add more ink (with the same colors) to marbleize another card or a 5"x2 ¾" white cardstock scrap for the inside (if you want to use a different color palette, empty the water and start fresh).
4. If some ink seeped onto the inside or back of your card, you can cover it with white paper or cardstock as desired (Or it might be a pretty marbleized touch that's just right, and you might not want to cover it).
5. Attach the large butterfly Dazzles™ to white cardstock and trim around the edges. Add Green Apple Smooch to your acrylic block. Add a small amount of water to the ink and mix together with the small paintbrush. "Paint" the open areas of the butterfly with the diluted Green Apple ink. Repeat for diluted Sugarberry ink. Use the Pool ink undiluted to finish filling in the open spaces of the butterfly. Attach the embellished sticker to the upper portion of the card front. Glue ribbon across the bottom of the card front. Glue the "happy birthday" word fragment centered over the ribbon.
6. Inside the card: Glue a 5"x2 ¾" marbleized rectangle across the inside of the card. Write or computer print a message on lavender textured paper. Trim to a rectangle and ink the edges. Glue over center of the marbleized rectangle.
7. Place a Dazzles™ border and small butterfly on white cardstock, then trim around the edges. Paint inside the spaces of the sticker with smooch as for the large butterfly on the front. Attach to inside as shown.

3. Cover squares of red, black and white cardstock with portions of the Adhesive Sheet. Place the glove Dazzles™ on white, the pants on red and shoes on black. Glue the red pants to the white square and the other images to the red.
4. Inside the card: Adhere the Mickey border sticker down the right edge of the card. Mat a 2½"x1½" rectangle of red suede with black cardstock, leaving a ⅛" border. Instructions:

1. Place newspapers on your work surface to protect it. Place the tote on the newspaper. Place newspaper over the handles to mask them from the spritz. Attach the Halloween Dazzles™ (don't add the witch yet, but leave the space for her) and alphabet masks (you will be using some letters more than once, so you will need to move them into their second position after spritzing) on one side of the tote as shown, pressing the edges in place so they adhere well to the tote.
2. Shake the Gingerbread Smooch spritz and spray over some areas of the tote over the stickers and masks, about 10" away from the tote. Also spray over the area where the witch will be. Add Grape and Emerald, then add more Gingersnap as needed. Work the area with the words a little at a time, so you can move the letters from one word to another as needed. The more spritz you spray on, the crisper the silhouette images will be. When you are finished spritzing, carefully remove the Dazzles™ and alphabet masks from the tote and wipe them off with a damp paper towel. Let the tote dry, at least overnight, before adding the Stickles. It may take a few days for the tote to dry completely.
3. Glue the witch Dazzles™ to the center of the tote, smoothing the edges down evenly. Use the Carrot Smooch ink to fill in the "moon" behind the witch. Fill in the witch's face with Green Apple. Let dry and add another coat if needed. Wipe off any excess smooch ink from the sticker with a damp paper towel.
4. Outline the letters and images with Stickles and let dry. Add crystals as shown. Ink a large leaf black and let dry. Arrange the black leaf plus orange and green leaves overlapping at the top of the tote near the handle. Add crystals and Zot™ leaves in place. Tie ribbons on the handle and knot the ends as shown.
